AT A GLANCE

Open-source tech news, ranked for decisions

SIGNAL reads trusted technology sources around the clock, groups reports into events, and tells each reader which ones need a decision, how strong the evidence is and what to watch next.

145

vetted sources, read directly

5 min

collection cycle, around the clock

100+

languages through the GDELT index

13

decision roles on one feed

WHERE SIGNAL FITS

SIGNAL starts where the alert ends

REAL-TIME ALERTING

What just happened?

- Detects events as they break
- A million or more public sources
- Built for watch floors and newsrooms
- Measured in minutes of lead time

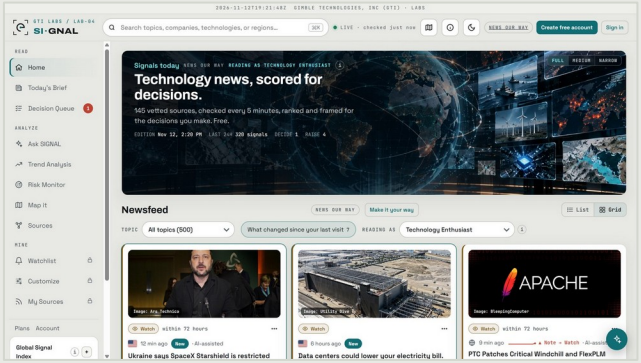

SIGNAL

What needs a decision?

- Ranks developments by decision pressure
- 145 vetted sources, plus GDELT
- Built for leaders and analysts
- Measured in decisions framed and evidence graded

The two are complementary: alerts build awareness; SIGNAL turns it into a ranked, evidenced decision queue for technology.

Five steps from raw reporting to a decision

The portal on 12 November 2026, as a visitor sees it before signing in.

1. **Collect**
   145 vetted sources every 5 minutes, plus GDELT searches worldwide
2. **Cluster and translate**
   Reports of one event joined into one story; foreign headlines translated
3. **Score**
   Relevance, impact, urgency and confidence; evidence graded
4. **Assess**
   AI frames what, why, when and who; figures checked in code
5. **Deliver**
   Decision Queue, briefs, maps, email, REST API and MCP connector

DECISION QUEUE

Every story arrives as a decision

LABEL

Four levels of pressure

- Decide
- Raise
- Watch
- Note

Assessed stories show the horizon beside the label, such as "Decide · within 72 hours".

EVIDENCE

Graded, not assumed

From Unconfirmed to Strong, with the source count and the publisher's country on every card. A company's own release never counts as the main source on itself.

OPENED STORY

The five Ws

What (the decision question), why, when, who would own it, and where. Then the next indicator to watch and four scores from 0 to 100.

ANALYTIC VIEWS

Views beyond the queue

Today's Brief

An AI bottom line for your role, what changed since yesterday, and the top three decisions.

Trend Analysis

30-day topic momentum, rising names and what is new this week.

Risk Monitor

Rising risks ranked, the indicators to watch and hotspots.

Map it

Stories by country in 2-D, 3-D or over satellite imagery.

Global Signal Index

The news cycle by day and hour: use it to time briefs and staff a watch floor.

Ask SIGNAL

Questions answered only from the current edition, with numbered citations.

READ FOR YOUR ROLE

One feed, re-read for 13 decision roles

Leader

Decide what needs a decision.

- Department of War (DoW)
- Intelligence Community
- DHS / CISA
- Policy and trade
- Industry and defense industrial base
- Big Tech and global commerce

Analyst

Assess the evidence behind each story.

- Defense and military
- Intelligence
- Cyber
- Financial and markets
- Policy and trade
- Industry and supply chain

Enthusiast

Follow what's new and why it matters.

- All technology: AI, chips, space, cyber, quantum and energy

Open sources, held to the evidence

Public information only

Public feeds, public APIs and the GDELT index. No purchased or personal datasets.

Credit and links

Headlines, short excerpts and links, publisher named. Articles stay with publishers.

Polite collection

robots.txt and feed terms respected; back-off on errors and rate limits.

Adversary-state media

Seen only through the GDELT index. SIGNAL never connects to those sites.

AI held to evidence

No facts beyond the headline and excerpt. Figures are checked in code.

No self-sourcing

A company's own release never serves as the main source on itself.

PLANS

Free to start, scoped for organizations

News Our Way

Free

no login

- Decision Queue and every view
- Pick your role
- Morning SIGNAL email at 6:30 a.m.

News Your Way

$6 / mo

or $60 / year

- Your topics and publishers
- Watchlist with a daily brief
- 25 Ask SIGNAL questions a day

News Anyway

$15 / mo

or $150 / year

- 25 of your own sources
- REST API and MCP connector
- Satellite imagery in Map it

Enterprise

Custom

from 100 seats

- Team views and watchlists
- SSO and security review
- Invoicing by PO, ACH or wire

Safeguards: hosted in the U.S.; TLS, strict content policy and rate limits; only an email needed for an account; data export and deletion in the app; payments by Stripe, no card data held.
